

# Green Earth Tank instructions

## step 1

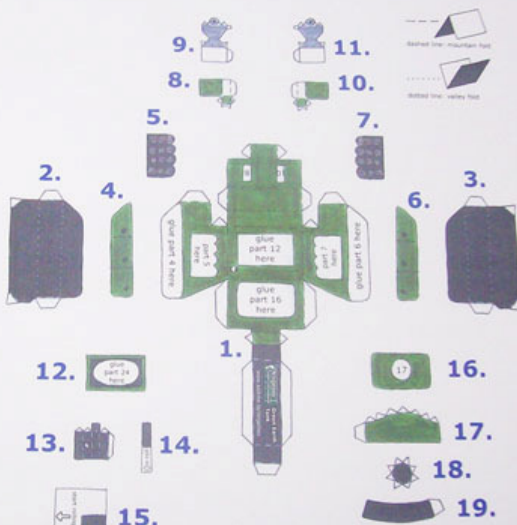

### Green Earth Tank

In the 2001 Game Boy Advance turnbased strategy game Advance Wars, Tanks are one of the most versatile units available to you.

Their high movement rate means that they can quickly advance on the enemy and keep them occupied while your slower moving HD Tanks or Rockets move in for the kill. Or just let them finish the job themselves, of course... :D)

game site: <http://www.advancemw.com/>

Print the parts on thicker paper (I use 200 gsm paper) and get out your papercrafting tools!

## step 2

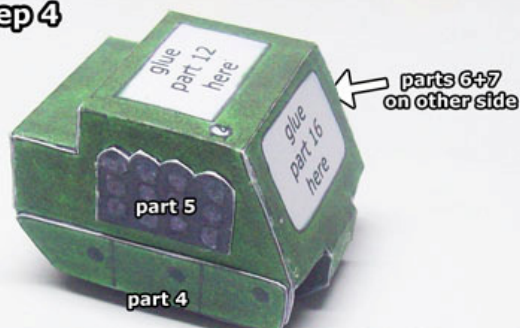

Score all the folds on part 1 so you can easily assemble it in the shape you see here.

## step 3

Cut out parts 2 and 3, fold them into a "U" shape, and then glue them underneath part 1.

## step 4

Cut out parts 4-7 and glue them on as indicated on part 1.

## step 5

After gluing part 9 into two sections of tube, fold it to create an "L" shape. Push the bottom part into the tube of part 8. Do the same for parts 9 and 10.
